

Making a Hypertufa Pumpkin

How much of each material do I need?

thehypertufagardener.com

Buckets	Portland	Peat Moss	<u>Perlite</u>	Water
one	3 quarts	3 quarts	3 quarts	Approx 3 quarts
two	1.5 gallons	1.5 gallons	1.5 gallons	2 gallons
three	2 gallons + 1 quart	2 gallons + 1 quart	2 gallons + 1 quart	2 gallons + 1 quart
four	3 gallons	3 gallons	3 gallons	3 gallons
five	3 gallons + 3 quarts	3 gallons + 3 quarts	3 gallons + 3 quarts	3 gallons + 3 quarts

These are approximations based on my use of materials. If your peat moss is super dry, you may need more water. It is better to have a little too much than not enough. I had a bit left over with this amount. Make a hypertufa ball to decorate your pots.
